Bag in Box 20 L.

FOOD SERVICE SOLUTIONS | juices / beverages / cocktails

Packaging: Bag in Box Solutions 20L.

The **B.I.B PACKAGES** for juice are showing an increasing demand on the world market.

This is an ideal package for **restaurants, hotels and catering** services because of the convenience, carriage and storage and as a package that preserves the quality of the juice allowing long term simple and easy usage.

The juice in bag products are offered in various bag volumes and are equipped with a wide range of convenient and efficient pouring systems. These systems prevent the penetration of air into the package, which is unavoidable when pouring.

THE VITOP TAP

Is the number one tap for the Bag-in-Box. This success is partly due to its ease of use - a small amount of pressure is sufficient to obtain a regular flow rate. The main reason for the tap's market leadership is exceptional quality.

The Vitop tap combines elegance and practicality, adding value to the Bag-in-Box package through its unique design. A frontal tamper-proof tear strip blocks the tap in a closed position until removed by the end-user, ensuring product integrity.
